

Change for delivery Dockets

Starting from 1st March 2021 VWR, part of Avantor will be making a small change for our delivery docket process across the European network. The team will start placing the delivery note inside the box rather than in a plastic envelop on the box.

A sticker will be added to the box with the delivery docket stating:

"Delivery note inside this box".

It will not be possible in all cases to move away from the plastic envelope, for example, where complete cases are being dispatched, for shipments direct from our vendors and where specific paperwork is needed to ship separately to the delivery.

We are making this change as we are dedicated to socially responsible business practices that strengthen and evolve our company while creating a better world for our customers, associates, suppliers, and communities.

By making this small change we will minimise our single-use plastic usage in our warehouse packaging.

We continue to focus on diverting waste from landfill by increasing the efficiency of our internal processes and expanding our recycling & repurposing capabilities. Further changes with our delivery note process may come as we look to streamline further.
